PROFESSIONAL PROFILE

Software developer focused on designing and building practical digital solutions across websites, web applications, software systems, dashboards and AI-powered tools. I approach development from both a technical and problem-solving perspective: understand what needs to work, structure the solution clearly, build it, test it and prepare it for real use.

My work is supported by broader IT fundamentals spanning systems, networking, cybersecurity, cloud technologies, systems administration and Microsoft Azure fundamentals.

CORE CAPABILITIES

Software & Web Software development, web applications, responsive websites, interface development	Systems & Data IT systems, dashboards, data interfaces, workflow automation, technical problem solving
AI & Digital AI-assisted development, AI workflows, digital media technology	Infrastructure Foundation Networking, cybersecurity fundamentals, cloud fundamentals, Microsoft Azure fundamentals

CURRENT DEVELOPMENT STACK

React	Next.js	JavaScript	Tailwind CSS
Git	GitHub	Microsoft Azure	AI Development Tools

INDEPENDENT BUILD ROADMAP

Broadcast Operations Dashboard

Planned independent build exploring service health, incidents, system availability and operational monitoring.

Media Content Management System

Planned independent digital media platform exploring metadata, publishing status, content discovery and media workflows.

AI IT Support Assistant

Planned AI-powered support tool for issue classification, troubleshooting guidance and structured support ticket creation.

These are planned self-initiated projects. Case studies, live demos and source links will be added as each build is completed.

DELIVERY APPROACH

01 Understand Clarify the problem, users and outcome.	02 Plan Define structure, functionality and approach.	03 Build Develop interface and system functionality.
04 Test Validate functionality and user flows.	05 Refine Improve reliability and usability.	06 Deploy Prepare for release and continued improvement.

BACKGROUND

National Diploma in Information Technology

Formal technical foundation in information technology. Institution and study dates can be added once provided.

Available for selected client projects, technical collaborations and professional software opportunities.
